

LLANDRINDOD WELLS URBAN DISTRICT COUNCIL

Town Hall,

Llandrindod Wells.

November, 1967.

To the Chairman and Members,

I have pleasure in submitting for your consideration the Report of the Sanitary Conditions and Vital Statistics of the Urban District for the year 1966.

This Report is prepared in accordance with the instructions issued by the Welsh Board of Health, Circular 1/67 (Wales) and presents briefly the scope and activities of the Health Department.

This will be my last Report as Part-Time Medical Officer for the past 29 years to your Authority and I wish to thank the present and past members of the Council for the aid given in the work of ensuring the good health and well-being of the Townspeople.

Yours faithfully,

  
Medical Officer of Health.

LLANDRINDOD WELLS URBAN DISTRICT COUNCIL

REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE YEAR 1966

SECTION A.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA

Area of District	.....	1509 acres
Registrar General's Estimate of Resident Population - Mid. 1966	.....	3150 persons
Ditto - Mid. 1965	.....	3150 persons
Number of Inhabited Houses at the end of the year (including flats)	.....	1226
(Increase during the year 13)		
Rateable Value - 31st December, 1966	.....	£116068
Product of Penny Rate	.....	£459. 2. 9.

NATURAL AND SOCIAL CONDITIONS

During the year 1966 the health of the inhabitants young and old varied little from previous years. No illness could be said to have been directly attributable to poor housing, lack of nutrition, lack of hygiene or major infection

There were no excessive mortality or epidemics and the health of the townspeople was generally good.

The townspeople were fully employed throughout the year and unemployment of employable men and women was negligible. With the summer period of the holiday and tourist industry requiring additional staffs, it is found that part-time employment of married women and old age pensioners continues.

The livelihood of the townspeople still arose from employment in the distribution trades, administrative professions, national undertakings and the health, holiday and tourist industry.

As indicated in my Report for the year 1965, the erection of houses under private enterprise made a major step forward in that three housing development sites were started with site availability for the erection of upwards of 336 houses. This programme of private house erection will supply the needs of people who retire to the town at the end of their working life.

Climatological Conditions. The climatological conditions of 1966 were as detailed in the following tabulation which includes comparisons with previous years:-

	<u>1966</u>	<u>1965</u>	<u>1964</u>	<u>1963</u>
Total rainfall (inches)	43.59	44.22	31.58	35.15
Highest maximum temperature	80°F	78°F	77°F	79°F
Average maximum temperature	54.2°F	52.9°F	53.9°F	51.7°F
Lowest minimum temperature	16°F	7°F	7°F	1°F
Average minimum temperature	40°F	39.3°F	40.2°F	38.8°F
Sunshine Hours	1003.8	1096.0	1071.7	1125.3

Rainfall for the year was above average by 3.59 inches.

Sunshine for the year was below the average of 1298 hours per annum with the summer months of June, July and August being dull and totalling 383.5 hours as compared with 553.5 hours in the corresponding months of 1962 and 425.9 for the previous year.

Weather conditions could not be said to have any adverse affect on the health of the townspeople.

TABLE 1  
VITAL STATISTICS OF THE DISTRICT DURING 1966

	TOTAL	Male	Female
Live Births (Legitimate	30	16	14
(Illegitimate	6	3	3
	36	19	17
Still Births (Legitimate	Nil	Nil	Nil
(Illegitimate	Nil	Nil	Nil

LIVE BIRTHS

Number	36
Rate per 1000 population	11.4
Rate per 1000 population - 1965	16.2
Illegitimate live births per cent of total live births	16.6

STILL BIRTHS

Number	Nil
Rate per 1000 total live and still births	Nil
Total live and still births	36
Infant deaths (deaths under 1 year)	Nil
Infant mortality rates:-	
Total infant deaths per 1000 total live births	Nil
Illegitimate infant deaths per 1000 illegitimate live births	Nil
Legitimate infant deaths per 1000 legitimate live births	Nil
Neo-Natal mortality rate (deaths under 4 week per 1000 total live births)	Nil
Early Neo-Natal mortality rate (deaths under 1 week per 1000 total live births)	Nil
Peri-Natal mortality rate (still births and deaths under 1 week combined per 1000 total live and still births)	Nil
Maternal mortality (including abortion):-	
Number of deaths	Nil
Rate per 1000 total live and still births	Nil

DEATHS

	Total	Male	Female
Number of deaths	58	26	32

The death rate per 1000 of the estimated resident population was 18.4

Death Rate for previous years:-

1965	16.2	1961	14.9
1964	18.03	1960	14.9
1963	18.6	1959	14.5
1962	15.7	1958	13.55
		1957	11.76

Death rate per 1000 of estimated resident population in the over 75 age group - 9.8.

TABLE 2  
STATISTICS OF CAUSES OF DEATH

CAUSES OF DEATH	M.	F.
All Causes	26	32
1. Tuberculosis Respiratory	Nil	Nil

28. Suicide	1	Nil
29. Homicide and operations of War	Nil	Nil

SECTION B.

GENERAL PROVISIONS OF HEALTH SERVICE IN THE AREA

1. Public Officers:-

Medical Officer of Health (Part-time)

Dr. J. Emrys Jenkins, M.A., B.M., B.Ch.,  
Chalfont, South Crescent,  
LLANDRINDOD WELLS.

Telephone No. 2000

Public Health Inspector (Part-time)

R.J. Morris, Esq., A.R.I.C.S., M.R.San.I.,  
Town Hall, Temple Street,  
LLANDRINDOD WELLS.

Telephone No. 2222

2. Laboratory Facilities

The examination and analysis of water, sewage effluents and stream contamination are carried out by the Public Analyst of the County Laboratory, Carmarthen - Analyst:- H.J. Evans & Partners.

3. Health Services The following services are carried out by the Radnorshire County Council under the National Health Service Act, 1946 and Mental Health Act, 1959. The County Council services are efficiently and well organised.

- (i) Maternity and Child Welfare.
- (ii) Clinics.
- (iii) Dental care for expectant mothers and nursing mothers and young children together with School Dental Services.
- (iv) Midwives Service, delegated to the Radnorshire County Nursing Association.
- (v) Health Visiting delegated to the Radnorshire County Nursing Association.
- (vi) Vaccination and immunisation of children under five and of school age is carried out by Registered Medical Practitioners of the parents' choice or by the County Medical Officer.  
  
(The vaccination of adults is carried out by Registered Medical Practitioners.)
- (vii) Ambulance Service.
- (viii) Prevention of illness, Care and After Care of persons suffering from tuberculosis, mental illness or defectiveness and other types of illness is organised under the aegis of the County Health Committee.
- (ix) Domiciliary Health Services.
- (x) Home nursing delegated to the Radnorshire County Nursing Association.
- (xi) Health Education is carried out by the Radnorshire County Council.
- (xii) Mental Health.
- (xiii) Chiropody Service.
- (xiv) Arrangements for fluoridation of public water supplies.

SANITARY CIRCUMSTANCES OF THE AREA

WATER SUPPLY

The water supply to the district became the responsibility of the Radnorshire and North Breconshire Water Board from the 1st April, 1966.

The purification and clarification of the water, as taken from the River Ithon, was satisfactory throughout the year. Quality was good and quantity sufficient.

The main source of supply remained the River Ithon and purification as previously reported.

Tabulated list of Analyst's Reports are given in Table 3.

Statistics in respect of the Water Supply are detailed below:-

Estimated population supplied from public water mains in Urban District ...	3262
Estimated population not supplied from public water mains .....	20
Number of dwelling houses or flats supplied direct into premises .....	1220
Number of dwelling houses and farms supplied by means of stand pipes .....	Nil
Estimated population supplied by stand pipes .....	Nil
Number of premises (farms) with own piped supplies .....	5
Number of premises (farms) with no piped supplies .....	Nil
Premises supplied from mains and outside Urban District .....	20
Estimated population so supplied .....	95

TABLE 3.

Bacteriological analysis for the year 1966 carried out by H.J. Evans & Partners, Public Analysts, Bank Lane, Carmarthen.

Tabulation of Analysts' Reports on samples of water taken from house services, direct off supply main; water supplied from River Ithon.

Date of samples	No. of organisms 48 hrs. @ 22°C	Coli present in c.cs.					REMARKS
		100	50	25	20	10	
11.2.66	6	Nil					Satisfactory bacterial purity.
21.7.66	3	Nil					High bacteriological quality.

Chemical Analysis - Nil

SWIMMING POOL. The swimming pool operated by the Council was maintained to a satisfactory standard.

The water supply to the pool of 133,000 gallon capacity is taken from the domestic water supply and the pool replenished as necessary. The water is treated by straining and filtration, sterilization being by injection of chlorine. Alkali as sodium carbonate is added as necessary.

The circulation of the pool water is over a period of 10 to 12 hours and from the opening of the pool at 1st June to closing at end of September the filtration plant was kept in continual operation.

Twice daily tests were made with comparator for free chlorine and alkalinity.

The reports on samples taken for bacteriological analysis are as under:-

Dates of samples	Organisms per c.c. 48 hrs. @ 22°C	Coliform organisms per 100 c.cs.	Faecal Coli per 100 c.cs.
21.7.66	15	Nil	Nil

OBSERVATIONS - The absence of coliform organisms from the swimming pool water showed that the plant was being very efficiently maintained.

#### DRAINAGE AND SEWERS.

1. Drainage Generally no major difficulties were experienced on the sewer systems of the town. Flooding occurred in June and October at two premises. This followed very heavy storm and back flush from the main sewer into the basement of the properties. Defects at storm water overflow on the trunk sewer were remedied by adjustment of the overflow weir.

2. Sewage Disposal The disposal works were operated satisfactorily during the year.

The results of analysis are given below. Samples for general check of the functioning of the works were taken during the year.

TABLE 4.

Tabulation of Reports on samples of effluent analysed by Wye River Board.

Parts per million -

Date of Sample	Suspended Solids	Biochemical oxygen demand 5 days	Oxygen absorbed 4 hours settled	Oxygen absorbed 4 hours shaken	Remarks
<u>1966</u>					
February	29	3.5	4.0	5.6	Satisfactory
May	68	20.0	9.8	14.6	Excessive Solids
July	22	15.7	8.4	10.6	Satisfactory
November	48	13.6	6.4	9.4	Unsatisfactory suspended solids

In the May the flow to the works was over the 6 times dry weather flow and storm surge was experienced.

In November a rainfall of 0.83 inches during day light hours increased the flow to the works to cause disturbance throughout.

Tabulations of analysts Report on samples of final effluent dispatched by the Consulting Engineers to Messrs. Bostock Hill & Rigby.

Parts per million -

Date of Sample	Biochemical Oxygen demand	Suspended Solids	Analysts Remarks
<u>1966</u>			
23rd February	2	4	Organically of excellent quality. Just acceptable amount of suspended solids.
25th May	6	12	Final effluent excellent.
4th October	4	35	Suspended solids over Royal Commission standard.

The Report of the Consulting Engineers on the 14 months of operation was subsequently received in 1967.

Rivers and Streams Inspections of rivers and streams in the Urban District were carried out. No action on pollution was necessary.

Public Cleansing (i) The collection and disposal of household refuse has continued on the same principle as other years. No variation in collection of domestic properties once each week and twice each week from certain trade and hotel premises has been necessary.

Investigations into the possible lease of suitable land to open up a controlled tip site did not mature and incineration continued throughout the year, clearance of the accumulation of clinkers and unsaleable light destructor scrap was carried out.

(ii) The collection and sale of salvaged materials comprising waste paper, broken glass, bottles, scrap iron and tins has continued.

During the year you disposed of:-

66 tons 7 cwts. of waste paper

10 tons 5 cwts. of cullett

3 tons 2 cwts. of scrap metal.

Common Lodging Houses There are no common lodging houses in the Urban District.

## FOOD

Food Hygiene The enforcement of the food hygiene regulations was carried out by inspection and circulation of posters supplied by the Ministry of Food.

Special inspections were made of the kitchens and food preparation establishments of the four large hotels and catering establishments.

No prosecutions were found necessary.

TABLE 5

Tabulation of Food Premises subject to Regulations

Categories of Trades	No. of Premises	No. fitted to comply with Regulation 16	No. to which Regulation 19 applies	No. fitted to comply with Regulation 19

Number of inspections of food preparation establishments ... ..	16
Action taken in respect of food storage (informal) ... ..	Nil

TABLE 7

Foods surrendered or condemned and destroyed

Various canned foods .....	64 tins
Hams, bacon, sausages and cooked pork .....	58 lbs.
Fish .....	5 lbs.
Beef and other meats .....	Nil

Condemned food, unless salvagable, is destroyed  
at the incinerator.

Liquid Egg (Pasteurisation) Regulations 1963 There are no egg pasteurisation plants in the Urban District.

Food Poisoning Outbreaks

No cases of food poisoning occurred during the year.

Poultry Dressing and Packing

There are no establishments in the Urban District.

Slaughter of Animals and Meat Inspection

One slaughterhouse was continued in use during the year.

100% post mortem inspection has been carried out.

The charges made to the slaughterhouse proprietors for inspection and stamping are based on cost to the Council with administration charges added.

Licences to Slaughter Animals

(i) To slaughter cattle, sheep and pigs - 5

Mumps	"	"	"
TOTALS	28	Nil	Nil

Inspections carried out in respect of infectious diseases	- Nil
Rooms fumigated for infectious diseases or otherwise	- Nil
Rooms fumigated for vermin	- Nil

Cancer      No action taken.

Blindness No action taken.

Tuberculosis The requirements of the Public Health (Tuberculosis) Regulations 1939 have been carried out.

No action has been taken under the special powers given to local authorities under these Regulations.

No applications were received by the Council under Section 172 of the Public Health Act, 1936 for the removal to hospital of persons suffering from tuberculosis of the respiratory tract.

TUBERCULOSIS - NEW CASES AND MORTALITY  
DURING 1966

[illegible]

## HOUSING

In accordance with the instructions of Circular 17/66 Wales, the inclusion of details of housing matters are omitted.

No. of Inspections on Housing Matters - 78

## OFFICES AND SHOPS ACT

Inspections were carried out during the year of offices and shops in accordance with the requirements of the Act. 46 establishments were inspected.

The following summary arose from the inspections:-

	<u>1966</u>	<u>1965</u>
Shops and offices without W.C. Accommodation	3	9
Shops and offices without washing facilities	2	12
Shops and offices without 1st aid equipment	4	4
Shops and offices without Thermometers	12	37

# SANITARY INSPECTION OF THE AREA

## Summary of the work of the Sanitary Inspector's Department

Total number of inspections and visits made - 563

<u>Nuisances</u>		<u>Lodging Houses</u>	
No. of visits re nuisances	12	No. registered	Nil
Visits re works in progress	8	<u>Water Supply</u>	
Notices issued:-		No. of samples taken	2
(a) Informal letters )	6	No. found polluted	Nil
